

Swiss precision for excellent audio quality

VOICE TECHNOLOGIES

VT602 Stereo Earphone, beige straight cable

The renowned VT600-sound. In Stereo.

The VT602 is a stereo version of the well-known VT600 of Voice Technologies.

Excellent sound and ease of use are the primary user benefits. The VT602 is the ideal solution for discreet „stereo“ listening (for example with a professional camera).

The VT602 comes with 2 Flexible Ear Inserts. The open frame design still allows the user to hear ambient noise, they fit without pressure entirely in the outer auditory canal. They are very comfortable even after many hours, are hygienic and can be cleaned very easily.

Application area: Camera operator
