## VT901MKII Earhanger Microphone

**Perfect fitting. Discreet design. Discover the VT-901MKII from Voice Technologies.**

The VT901MKII is a new extremely light earhanger microphone that offers exceptional voice transmission and superb wearing comfort. The VT901MKII boasts a specialized super-miniature omni capsule producing very natural speech and vocals. The successor of the VT901 has been developed based on customer feedback – the cable now runs directly along the head of the user. This makes it even more discreet when being used on stage, during broadcast productions and for presentations, without affecting the ergonomic design. The soft “spiral ear fastener” gives any user the perfect fit every time without the fear of it slipping off. The VT901MKII can be worn either on the left or the right ear. The high wearing comfort is achieved through the low weight as well as through its very flexible material; thus the microphone is comfortable even after many hours. The cable is removable and can be easily exchanged to swap connectivity between different wireless systems. This must-have design feature for rental houses also benefits individual users who have backup wireless systems by different brands. The spiral ear-wrap section can be exchanged as well.

**Application area:** Vocals - Broadcasting - Presentation - Stage

# VT901MKII Earhanger Microphone

## Specifications:

Generating Element:	Electret Condenser
Polar Pattern:	Omni-Directional
Frequency Range:	20-20'000 Hz
Sensitivity:	-35dB $\pm$ 3dB 1V/microbar (17.8mV/Pa)
Noise Level:	25dB "A" weighted
Max. Input SPL:	125dB
Impedance:	2 kOhm
Bias/+VDC:	0.8-5V
Colors:	beige
cable:	Length 1.2m (4.7") $\varnothing$ 1.3mm
Weight:	5g (0.18 oz)

## Wiring Configuration (2-wire):

Red	+ VDC
Copper	Ground

## Frequency range:

## Standard Accessories

VT701/901  
Cable

WS701/901

WS701/901

## Standard Packaging

Plastic Box
